

AI Resume Screening & Ranking — Results

Generated 2026-09-23 17:18 | LLM used: True | duration: 10.35s

Batch summary

Total resumes	50	Eligible	41
Parsed OK	50	Rejected	9
Parse failed	0	Duplicates skipped	0
LLM scored (survivors)	41	Skipped by hard gate	9
GitHub enriched	6	GitHub no profile	25
GitHub tagged (rate-limited)	10	GitHub tagged (error)	0

Shortlist — eligible candidates (41)

Det = deterministic baseline (no LLM) • **Final** = with LLM project scoring • Δ = LLM contribution • **AI** shows det→llm depth. Every other category is deterministic and unchanged.

#	Candidate	Det	Final	Δ	AI (det→llm)	PY	Cloud	GH	Pen
1	Yash Maini	74.2	99.5	+25.3	15→40	30	15	10	0
2	PRAJWAL A S	84.7	88.2	+3.5	36→39	30	6	8	0
3	V Sree Raghu Vardhan	60.0	88.0	+28.0	10→38	30	15	0	0
4	Hari Shanker Sharma	74.6	86.5	+11.9	25→36	30	15	0	0
5	ARUNIMA SAHA	59.9	85.6	+25.7	10→36	30	15	0	0
6	ABHINAV MISHRA	76.5	85.0	+8.5	22→30	27	13	10	0
7	Gourab Das	62.8	85.0	+22.2	8→30	30	15	5	0
8	Vivek Chimnani	77.6	83.3	+5.7	23→29	29	15	5	0
9	Prathamesh Patil	83.7	82.2	-1.5	34→35	30	15	0	-3
10	Sumaiya Sultana Shaik	65.2	81.7	+16.5	28→32	30	15	0	0
11	Thejeshwaar Paasila	73.2	81.5	+8.3	18→27	30	15	5	0
12	Kiran Naregal	61.5	78.8	+17.3	16→36	24	13	5	-3
13	Nevil Jasmin Mehta	53.1	78.6	+25.5	16→29	30	15	0	0
14	Aditi Kala	57.1	78.0	+20.9	6→33	29	15	5	-6
15	Arjun Kumar	73.8	75.2	+1.4	25→27	30	8	10	0
16	RAJ THUMAR	70.7	75.0	+4.3	25→29	30	11	0	0
17	Vaibhav Wakde	61.6	74.1	+12.5	20→32	30	7	0	0
18	SHUBHANSHU NAVADIYA	53.4	70.2	+16.8	17→36	30	4	0	-3
19	PAVANI A	61.9	69.9	+8.0	16→21	30	13	5	0
20	Jyandeep Baishya	62.7	69.7	+7.0	28→35	25	5	0	0
21	ANNISHA S	46.1	69.1	+23.0	16→26	30	7	5	0
22	Agam Jain	70.1	68.7	-1.4	27→25	30	10	0	0
23	Vivek Shekhawat	51.1	68.0	+16.8	13→29	24	5	5	0
24	PRIYANSHU KUMAR	53.8	65.8	+12.0	25→37	23	3	0	0
25	HARSHA A	55.1	64.3	+9.1	17→26	30	7	0	0

... and 16 more eligible candidate(s).

How the final score is built (deterministic vs LLM)

Every category is computed deterministically from resume evidence. The LLM refines **only** the AI / Agentic project-depth category, scoring each AI project 0-10 with a rationale and cited evidence. The **final** score is the deterministic score with the AI-depth category replaced by the LLM judgement; all other categories are identical. For the score breakdown below, the AI-depth row shows what the deterministic signal estimate gave versus what the LLM decided.

#1 Yash Maini — final 99.5 · deterministic 74.2 · LLM +25.3

Category	Deterministic	With LLM	Change
AI project depth (40)	14.7	40.0	+25.3
Python & backend (30)	30.0	30.0	+0.0
Cloud / full-stack (15)	15.0	15.0	+0.0
GitHub (10)	9.5	9.5	+0.0
Engineering depth (5)	5.0	5.0	+0.0
Penalties	0.0	0.0	+0.0
TOTAL	74.2	99.5	+25.3

AI depth: CopyGuard: depth 5.0/10 — The project demonstrates solid production-grade infrastructure and backend engineering for a GenAI service, though it lacks complex agentic...

Project: CopyGuard: A serverless GenAI code detection platform built on AWS Lambda and Bedrock. It provides low-latency detection for burst traffic with full infrastructure-as-code implementation.

#2 PRAJWAL A S — final 88.2 · deterministic 84.7 · LLM +3.5

Category	Deterministic	With LLM	Change
AI project depth (40)	35.7	39.2	+3.5
Python & backend (30)	30.0	30.0	+0.0
Cloud / full-stack (15)	6.0	6.0	+0.0
GitHub (10)	8.0	8.0	+0.0
Engineering depth (5)	5.0	5.0	+0.0
Penalties	0.0	0.0	+0.0
TOTAL	84.7	88.2	+3.5

AI depth: AI Voice Appointment Assistant: depth 7.0/10 — The project demonstrates strong backend integration and tool-calling architecture to ensure data consistency in a...

Project: AI Voice Appointment Assistant: A real-time, multilingual voice AI agent for healthcare appointment management. It utilizes WebRTC for low-latency interaction and integrates with a PostgreSQL database via...

#3 V Sree Raghu Vardhan — final 88.0 · deterministic 60.0 · LLM +28.0

Category	Deterministic	With LLM	Change
AI project depth (40)	10.0	38.0	+28.0
Python & backend (30)	30.0	30.0	+0.0
Cloud / full-stack (15)	15.0	15.0	+0.0
GitHub (10)	0.0	0.0	+0.0
Engineering depth (5)	5.0	5.0	+0.0
Penalties	0.0	0.0	+0.0
TOTAL	60.0	88.0	+28.0

AI depth: AI-driven enterprise HRMS workflows: depth 10.0/10 — This is a highly sophisticated production-grade system featuring multi-step orchestration, state management,...

Project: AI-driven enterprise HRMS workflows: A complex system of multi-step AI agents integrated with enterprise APIs, semantic retrieval, and document processing to automate HR tasks. It features structured output...

#4 Hari Shanker Sharma — final 86.5 · deterministic 74.6 · LLM +11.9

Category	Deterministic	With LLM	Change
AI project depth (40)	24.6	36.5	+11.9
Python & backend (30)	30.0	30.0	+0.0
Cloud / full-stack (15)	15.0	15.0	+0.0
GitHub (10)	0.0	0.0	+0.0
Engineering depth (5)	5.0	5.0	+0.0
Penalties	0.0	0.0	+0.0
TOTAL	74.6	86.5	+11.9

AI depth: 500Agents: depth 9.0/10 — Demonstrates high-level agentic orchestration using LangGraph, multi-provider routing, and session persistence at scale.

Project: Sasta Signals: A distributed price monitoring system that tracks products across 7 major Indian e-commerce platforms using automated web scraping. It features real-time price drop detection with notifications...

#5 ARUNIMA SAHA — final 85.6 · deterministic 59.9 · LLM +25.7

Category	Deterministic	With LLM	Change
AI project depth (40)	10.0	35.7	+25.7
Python & backend (30)	29.9	29.9	+0.0
Cloud / full-stack (15)	15.0	15.0	+0.0
GitHub (10)	0.0	0.0	+0.0
Engineering depth (5)	5.0	5.0	+0.0
Penalties	0.0	0.0	+0.0
TOTAL	59.9	85.6	+25.7

AI depth: Multi-Agent Travel Planning System: depth 9.0/10 — This is a sophisticated multi-agent system featuring complex orchestration, human-in-the-loop workflows, and robust...

Project: Multi-Agent Travel Planning System: An agentic travel planning and booking system that uses LangGraph to orchestrate specialized nodes for flight/hotel search and booking. It features human-in-the-loop...

#6 ABHINAV MISHRA — final 85.0 · deterministic 76.5 · LLM +8.5

Category	Deterministic	With LLM	Change
AI project depth (40)	21.6	30.1	+8.5
Python & backend (30)	26.6	26.6	+0.0
Cloud / full-stack (15)	13.2	13.2	+0.0
GitHub (10)	10.0	10.0	+0.0
Engineering depth (5)	5.0	5.0	+0.0
Penalties	0.0	0.0	+0.0
TOTAL	76.5	85.0	+8.5

AI depth: Construct IDE: depth 8.0/10 — The project demonstrates sophisticated agentic orchestration and state management to provide a continuous, personalized learning experience.

Project: Construct IDE: An AI-native teaching IDE that generates personalized coding lessons, implementation tasks, and concept checks. It maintains persistent learner state and session continuity across project steps...

#7 Gourab Das — final 85.0 · deterministic 62.8 · LLM +22.2

Category	Deterministic	With LLM	Change
AI project depth (40)	8.0	30.1	+22.1
Python & backend (30)	30.0	30.0	+0.0
Cloud / full-stack (15)	15.0	15.0	+0.0
GitHub (10)	4.8	4.8	+0.0
Engineering depth (5)	5.0	5.0	+0.0
Penalties	0.0	0.0	+0.0
TOTAL	62.8	85.0	+22.2

AI depth: Tool-augmented AI agents: depth 8.0/10 — This project utilizes advanced orchestration frameworks and tool-calling to solve real-world intelligence gathering tasks.

Project: SMILE: A full-stack platform built with Django and React to manage donor and patient data. It includes automated infrastructure deployment using Docker and CI/CD pipelines.

#8 Vivek Chimnani — final 83.3 · deterministic 77.6 · LLM +5.7

Category	Deterministic	With LLM	Change
AI project depth (40)	23.2	28.9	+5.7
Python & backend (30)	29.4	29.4	+0.0
Cloud / full-stack (15)	15.0	15.0	+0.0
GitHub (10)	5.0	5.0	+0.0
Engineering depth (5)	5.0	5.0	+0.0
Penalties	0.0	0.0	+0.0
TOTAL	77.6	83.3	+5.7

AI depth: AI Research Copilot (LangGraph): depth 8.0/10 — The project demonstrates advanced agentic design through multi-node orchestration, conditional routing, and state...

Project: AI Research Copilot (LangGraph): A research assistant utilizing a multi-node workflow for planning, research, and report generation. It features session persistence, conditional routing, and modular backend...

#9 Prathamesh Patil — final 82.2 · deterministic 83.7 · LLM -1.5

Category	Deterministic	With LLM	Change
AI project depth (40)	33.7	35.2	+1.5
Python & backend (30)	30.0	30.0	+0.0
Cloud / full-stack (15)	15.0	15.0	+0.0
GitHub (10)	0.0	0.0	+0.0
Engineering depth (5)	5.0	5.0	+0.0
Penalties	0.0	-3.0	-3.0
TOTAL	83.7	82.2	-1.5

AI depth: Adaptive Agentic RAG - Multi-Agent Research System: depth 9.0/10 — The project demonstrates high-level engineering through multi-agent orchestration, self-correction...

Project: Adaptive Agentic RAG - Multi-Agent Research System: A multi-agent research system using LangGraph for conditional routing between vector stores and web search. It features self-correction nodes for...

#10 Sumaiya Sultana Shaik — final 81.7 · deterministic 65.2 · LLM +16.5

Category	Deterministic	With LLM	Change
AI project depth (40)	28.1	31.6	+3.5
Python & backend (30)	30.0	30.0	+0.0
Cloud / full-stack (15)	15.0	15.0	+0.0
GitHub (10)	0.0	0.0	+0.0
Engineering depth (5)	5.0	5.0	+0.0
Penalties	-13.0	0.0	+13.0
TOTAL	65.2	81.7	+16.5

AI depth: Privacy Risk Intelligence Platform: depth 8.0/10 — The project demonstrates a sophisticated multi-layer architecture with selective LLM invocation, rigorous testing, and...

Project: Privacy Risk Intelligence Platform: A 3-layer privacy-risk analysis system that combines NLP for PII detection, a Random Forest classifier for risk scoring, and a LangChain-orchestrated LLM layer for...

Rejected candidates (9) — and why

Eligibility is a hard, deterministic filter: a candidate must show **Python** AND **AI/agent** evidence. Reasons name only the unmet requirement — never the presence of an “unwanted” skill. *matched_skills* is the evidence that was found.

Candidate	Rejection reason(s)	Matched skills (what we did find)
AABHAR GUPTA	No evidence of Python stack; No AI/agent project evidence	PostgreSQL, MongoDB, Redis, REST API, Node.js, Express, JavaScript, GCP, CI/CD, React
ANJALI PATIL	No evidence of Python stack; No AI/agent project evidence	PostgreSQL, MySQL, Redis, SQL, REST API, Java, Spring Boot, JavaScript, Docker, Testing
Gayathri Palraj	No AI/agent project evidence	Python, MySQL, MongoDB, SQL, REST API, Node.js, Express, Java, TypeScript, JavaScript
Harshit Kumar Mishra	No evidence of Python stack; No AI/agent project evidence	PostgreSQL, MongoDB, Redis, SQL, GraphQL, WebSockets, Node.js, Express, C++, TypeScript
Kartikay Sinha	No evidence of Python stack; No AI/agent project evidence	MySQL, MongoDB, SQL, REST API, Node.js, Express, C++, TypeScript, JavaScript, Docker
MD AZIZUL ISLAM	No evidence of Python stack	OpenAI API, RAG, Embeddings, pgvector, LLM, PostgreSQL, MongoDB, Redis, SQL, REST API
Mukul Pal	No evidence of Python stack	OpenAI API, LLM, PostgreSQL, MongoDB, Redis, REST API, WebSockets, Node.js, Express, TypeScript
SHIVAM RAJ	No evidence of Python stack; No AI/agent project evidence	REST API, Node.js, Express, TypeScript, JavaScript, Azure, Docker, CI/CD, Vercel, Render
Shreya Chauhan	No AI/agent project evidence	Python, MySQL, MongoDB, Redis, SQL, REST API, Kafka, Node.js, Express, Java

Eligibility is a hard, deterministic filter (Python AND AI/agent evidence). Scores are evidence-source weighted; the LLM contributes AI project depth with cited evidence. GitHub rate-limited/errored profiles are tagged and given a neutral placeholder.
